

JOHN 1:1–1:5: GREEK ORIGINAL TEXT, INTERLINEAR TRANSLATION & THE ONTOLOGY OF THE LOGOS

Why Logos Must Not Be Translated as ‘Word’ and Its Isomorphism with Quantum Information Theory (QIT)

Author: Thomas Riebl

Date: September 5, 2026

Classification: Philosophical Philology • Quantum Information Theory • Active Inference • Conative-Integrative Framework (CIF)

I. VERSE-BY-VERSE GREEK ORIGINAL AND INTERLINEAR TRANSLATION

Translation Principle:

*The term **Logos** (λόγος) is deliberately preserved untranslated. Translating it as “Word” commits a category error, reducing a cosmic, generative, and relational matrix to mere human speech.*

Verse 1:1

Ἐν	ἀρχῇ	ἦν	ὁ	λόγος,		
En	archē	ēn	ho	logos,		
[In]	[origin/principle]	[was]	[the]	[Logos],		
καὶ	ὁ	λόγος	ἦν	πρὸς	τὸν	θεόν,
kai	ho	logos	ēn	pros	ton	theon,
[and]	[the]	[Logos]	[was]	[in intimate relation with]	[the]	[God],
καὶ	θεός	ἦν	ὁ	λόγος.		
kai	theos	ēn	ho	logos.		
[and]	[divine in nature]	[was]	[the]	[Logos].		

Syntactic Note: In the third clause, θεός stands without the definite article before the verb ἦν, functioning as a qualitative predicate: The Logos is divine in essence and nature, identical with ultimate reality.

Verse 1:2

οὗτος	ἦν	ἐν	ἀρχῇ	πρὸς	τὸν	θεόν.
Houtos	ēn	en	archē	pros	ton	theon.
[This one]	[was]	[in]	[origin/principle]	[in relation with]	[the]	[God].

Verse 1:3

		πάντα	δι'	αὐτοῦ	ἐγένετο,		
		Panta	di'	autou	egeneto,		
		[All things]	[through]	[it/him]	[came into being / emerged],		
καὶ	χωρὶς	αὐτοῦ	ἐγένετο	οὐδὲ	ἐν	ὃ	γέγονεν.
kai	chōris	autou	egeneto	oude	hen	ho	gegonen.
[and]	[apart from]	[it/him]	[came into being]	[not even]	[one single thing]	[that]	[has come to be].

Verse 1:4

		ἐν	αὐτῷ	ζωῇ	ἦν,		
		en	autō	zōē	ēn,		
		[In]	[it/him]	[Life]	[was / resided],		
καὶ	ἡ	ζωῇ	ἦν	τὸ	φῶς	τῶν	ἀνθρώπων.
kai	hē	zōē	ēn	to	phōs	tōn	anthrōpōn;
[and]	[the]	[Life]	[was]	[the]	[Light]	[of]	[human beings];

Verse 1:5

	καὶ	τὸ	φῶς	ἐν	τῇ	σκοτίᾳ	φαίνει,
	kai	to	phōs	en	tē	skotia	phainei,
	[and]	[the]	[Light]	[in]	[the]	[darkness]	[shines],
καὶ	ἡ	σκοτία	αὐτὸ	οὐ	κατέλαβεν.		
kai	hē	skotia	auto	ou	katelaben.		
[and]	[the]	[darkness]	[it]	[not]	[overcame / extinguished / engulfed].		

2. CONTINUOUS READING TEXT

Greek Original (Nestle-Aland 28)

1:1 Ἐν ἀρχῇ ἦν ὁ λόγος, καὶ ὁ λόγος ἦν πρὸς τὸν θεόν, καὶ θεὸς ἦν ὁ λόγος.

1:2 οὗτος ἦν ἐν ἀρχῇ πρὸς τὸν θεόν.

1:3 πάντα δι' αὐτοῦ ἐγένετο, καὶ χωρὶς αὐτοῦ ἐγένετο οὐδὲ ἓν ὃ γέγονεν.

1:4 ἐν αὐτῷ ζωὴ ἦν, καὶ ἡ ζωὴ ἦν τὸ φῶς τῶν ἀνθρώπων.

1:5 καὶ τὸ φῶς ἐν τῇ σκοτίᾳ φαίνει, καὶ ἡ σκοτία αὐτὸ οὐ κατέλαβεν.

Verse-by-Verse English Translation (Preserving the Logos)

1:1 In the beginning [in the foundational origin] was the **Logos**, and the **Logos** was in dynamic relation with God, and divine in essence was the **Logos**.

1:2 This very one was in the beginning in dynamic relation with God.

1:3 All things came into being through it, and apart from it not a single thing came into being that has come to be.

1:4 In it was Life, and the Life was the Light of humanity.

1:5 And the Light shines in the darkness, and the darkness did not overcome it.

3. PHILOLOGICAL & PHILOSOPHICAL TREATISE: WHY LOGOS MUST NOT BE TRANSLATED AS ‘WORD’

The historic translation of the Greek term **λόγος (logos)** into Latin as *verbum* (Jerome’s Vulgate), into German as „*Wort*“ (Martin Luther), and into English as „*Word*“ represents one of the most consequential reductions in intellectual history. It amputates the cosmological, mathematical, and metaphysical dimensions of the Greek concept, diminishing it to acoustic speech or linguistic signs.

1. Etymology and Greek Semantic Breadth

The noun **λόγος** derives from the verb **λέγω (legō)**, which originally meant *to gather, arrange, order, count, and weave relations*.

In classical Greek thought, *Logos* signifies: - **Ratio and Proportion**: The mathematical relation between magnitudes (Euclid, Pythagoras). - **Cosmic Law and Reason**: The immanent order that governs the universe (Heraclitus, Stoicism). - **Meaning and Teleology**: The generative principle that imparts form (*eidos*) to formless matter (*hyle*).

To translate *Logos* as “Word” commits a category error: It confuses the medium of human speech with the ontological structure of the cosmos.

2. The Heraclitean Ur-Logos

For Heraclitus of Ephesus (c. 500 BCE), the *Logos* is the eternal, common ordering principle (*xynon*) that unifies cosmic opposites: > „*Although this Logos holds forever, humans fail to comprehend it... Listening not to me, but to the Logos, it is wise to agree that all things are One (Hen Panta)*.“ (Fragment B 50)

The *Logos* here is not a verbal announcement; it is the **fundamental informational law** governing cosmic transformation.

3. The Stoic *Logos Spermatikos*

In Stoic physics (Zeno, Chrysippus), the cosmos is sustained by the *Logos*, conceptualized as *Pneuma*—an active, ordering principle that permeates inert matter: - The **Logoi spermatikoi (seminal logoi)**: The generative informational programs that direct the development, morphogenesis, and self-preservation of living organisms.

4. Philo of Alexandria: The Bridge to the Gospel of John

Philo of Alexandria (c. 20 BCE – 50 CE) synthesized the Hebrew *Dabar* (the creative divine command) with the Greek *Logos*. For Philo, the *Logos* is: - The **Intelligible World (Kosmos Noctos)**: The immaterial realm of ideas and physical laws serving as

the blueprint for creation. - The **Bond of the Universe** (*Desmos*): The non-local cohesion preventing cosmic disintegration into chaos.

5. Goethe's Faust: The Inadequacy of "Word"

Johann Wolfgang von Goethe captured this linguistic inadequacy in *Faust I*: > „Geschrieben steht: „Im Anfang war das Wort!“ / Hier stock ich schon! Wer hilft mir weiter fort? / Ich kann das Wort so hoch unmöglich schätzen... / Auf einmal seh ich Rat und schreibe getrost: Im Anfang war die Tat!“

Goethe realized that "Word" was insufficient. Yet replacing it with "Deed" (*Tat*) merely replaces passive speech with mechanical action. The synthesis revealed by modern quantum information theory is: **In the beginning was the Logos—the relational informational code from which both action and matter arise.**

4. ISOMORPHISM WITH QUANTUM INFORMATION THEORY (QIT) & THE CIF

The Prologue of John (1:1–1:5) exhibits an exact structural isomorphism with the axioms of modern Quantum Information Theory and the **Conative-Integrative Framework (CIF)**.

1. Verse 1:1 $\iff$ Wheeler's *It from Qubit* & Universal Quantum State $|\Psi\rangle$

„Ἐν ἀρχῇ ἦν ὁ λόγος...“ $\iff$ Information as the Ontological Ground

- **Physical Correspondence:** In classical physics, material particles are primary, and information is a secondary attribute. Quantum Information Theory inverts this ontology: As John Archibald Wheeler formulated in his paradigm „**It from Bit**“ (generalized to „**It from Qubit**“), every physical entity (*it*) emerges from quantum measurements and binary relational answers.
- **The Logos as $|\Psi\rangle$:** The Logos is the primordial universal wavefunction $|\Psi\rangle$ (*Mind-at-Large*)—an uncollapsed, infinite-dimensional superposition containing all possible ontological configurations. Information precedes matter; matter is the physical manifestation of structured information.

2. Verse 1:3 $\iff$ Entanglement, Non-Localities & Bell's Theorem

„πάντα δι' αὐτοῦ ἐγένετο, καὶ χωρὶς αὐτοῦ ἐγένετο οὐδὲ ἓν...“ $\iff$ Relational Holism

- **Physical Correspondence:** Verse 1:3 asserts that no entity possesses isolated, self-subsistent existence outside the relational web of the Logos.
- **Violation of Bell's Inequality:** In local classical realism, objects exist with independent, definite values. In quantum mechanics, Bell's Theorem ($S \leq 2\sqrt{2}$) proves that the universe is fundamentally non-separable. Two entangled particles *A* and *B* are described by a joint non-factorizable state:

$$|\psi_{AB}\rangle \neq |\psi_A\rangle \otimes |\psi_B\rangle$$

Separated particles remain non-locally correlated without classical signal exchange. Creation is not an assembly of isolated parts; it is an entangled relational holism mediated through the Logos.

3. Verse 1:4a $\iff$ Quantum Darwinism, Pointer States & Markov Blankets

„ἐν αὐτῷ ζῶν ἦν...“ $\iff$ Non-Equilibrium Self-Preservation(Conatus)

- **Physical Correspondence:** How does living, individual form ($Z\acute{o}\epsilon$) emerge from a continuous quantum substrate?
- **Pointer States & Markov Blankets:** Wojciech Zurek’s theory of **Quantum Darwinism** demonstrates that the interaction Hamiltonian with the environment selects stable **Pointer States** $|\pi_i\rangle$ that resist decoherence:

$$[H_{\text{int}}, |\pi_i\rangle\langle\pi_i| \otimes \mathbb{I}_E] \approx 0$$

As formulated in the **CIF (Axiom 6: Conatus)** and Karl Friston’s Active Inference, life constitutes a dissipative structure bounded by a **Markov Blanket** ($\mathcal{H}_B$). The blanket decouples internal states ($\mathcal{H}_I$) from environmental perturbations ($\mathcal{H}_E$), minimizing free energy ($F = U - TS \rightarrow \min$) to actively preserve low internal entropy. Life is the Logos localized into self-sustaining agency.

4. Verse 1:4b–1:5a $\iff$ The Measurement Problem, Participatory Universe & $\Phi > 0$

„καὶ ἡ ζῶν ἦν τὸ φῶς... καὶ τὸ φῶς ἐν τῇ σκοτίᾳ φαίνει...“ $\iff$ Qualia as Actualization

- **Physical Correspondence:** Darkness ($\sigma\kappa\omicron\tau\acute{\iota}\alpha$) corresponds to uncollapsed quantum potentiality—the dark ocean of probability amplitudes where all trajectories coexist without conscious realization.
 - **Light as First-Person Illumination** ($\Phi > 0$): Light ($\phi\acute{\omega}\varsigma$) is conscious observation. In Wheeler’s **Participatory Universe** and von Neumann’s quantum measurement framework, it is the subjective interaction that actualizes potentiality into concrete fact. Under the Integrated Information Theory (IIT) incorporated into the CIF, integrated information $\Phi > 0$ generates irreducibly unified qualitative experience (*Qualia*). Consciousness is the light that illuminates the dark quantum potential.
-

5. Verse 1:5b $\iff$ Unitarity ($U^\dagger U = I$) & the Braunstein-Pati No-Hiding Theorem

„καὶ ἡ σκοτία αὐτὸ οὐ κατέλαβεν.“ $\iff$ Absolute Conservation of Experiential Information

- **Philological Insight:** The Greek verb $\kappa\alpha\tau\alpha\lambda\alpha\mu\beta\acute{\alpha}\nu\omega$ (*katalambanō*) possesses profound dual semantics:
 1. *To comprehend / grasp* (epistemic).
 2. *To overpower / extinguish / swallow up* (ontological). The phrase asserts that darkness is powerless to extinguish the light.
- **The No-Hiding Theorem in Quantum Mechanics:** In quantum mechanics, time evolution is strictly **unitary**:

$$U^\dagger U = \mathbb{I}$$

The von Neumann entropy of the universe is invariant; quantum states can neither be duplicated (No-Cloning Theorem) nor destroyed (No-Deleting Theorem).

- **Braunstein-Pati No-Hiding Theorem (Physical Review Letters, 2007):** Samuel Braunstein and Arun Pati proved that if quantum information disappears from a local subsystem via decoherence, it is **never lost or hidden in local correlations**. It is completely transferred into the global entanglement structure of the universe.
- **Existential & Ars Moriendi Consequence:** Biological death is the dissolution of the individual Markov Blanket ($\mathcal{H}_B \rightarrow 0$). However, because of unitarity and the No-Hiding Theorem, **the experiential information, memories, and qualia generated during life are physically indestructible**. They return to the universal Logos. Darkness cannot swallow the light; experiential reality is eternally woven into the cosmic quantum matrix.

5. SYNOPTIC MATRIX: JOHN 1:1–1:5 VS. QUANTUM INFORMATION THEORY

John 1 Verse	Greek Core Term	Quantum Information Theory (QIT) & CIF	Physical & Metaphysical Significance
1:1	Ἐν ἀρχῇ ἦν ὁ λόγος	Universal State $ \Psi\rangle$ & Wheeler's <i>It from Qubit</i>	Primacy of information over matter; the cosmic matrix of potentiality.
1:3	Πάντα δι' αὐτοῦ ἐγένετο	Quantum Entanglement & Non-Locality (Bell $2\sqrt{2} > 2$)	Relational genesis; no isolated local realism; all entities are holistically entangled.
1:4a	Ἐν αὐτῷ ζωὴ ἦν	Quantum Darwinism & Markov Blankets	Decoherence resistance via Pointer States; active minimization of free energy (<i>Conatus</i>).
1:4b–1:5a	Τὸ φῶς φαίνει ἐν τῇ σκοτίᾳ	Measurement Problem, Participatory Universe & $\Phi > 0$	Actualization of probability waves via consciousness; 1st-person qualia illuminating the dark vacuum.
1:5b	Ἡ σκοτία αὐτὸ οὐ κατέλαβεν	Unitarity ($U^\dagger U = \mathbb{I}$) & No-Hiding Theorem	Strict information conservation: subjective experience is never erased at biological death.

6. CONCLUSION: THE FOUNDATIONAL BEDROCK FOR „VOM ANFANG BIS ZUM ENDE“

By re-establishing the ancient concept of the **Logos** in its full philological depth and demonstrating its exact isomorphism with the mathematical foundations of **Quantum Information Theory**, this work bridges the historical divide between ancient ontology and cutting-edge physics.

The Logos is neither an abstract theological dogma nor a human vocalization. It is: 1. The **universal informational matrix** ($|\Psi\rangle$), 2. The **relational entanglement** through which all things exist (1 : 3), 3. The **active Markov boundary** that shelters life against thermal decay (1 : 4a), 4. The **conscious light of qualia** that actualizes physical reality (1 : 4b), and 5. The **eternal conservation of experiential information** guaranteed by quantum unitarity (1 : 5b).

This synthesis provides the intellectual and spiritual compass for „*Vom Anfang bis zum Ende*“: From the primordial quantum potential through the conscious wave of life to the dignified return into the universal source.
